Straitjacket is an 11-track album with 45 minutes of brilliant electronic music showing the many talents of Esben Nørskov Andersen and Pernille Smith-Sivertsen. On *Straitjacket* both Esben and Pernille sing lead vocals adding new colors to Rangleklods' signature sound.

The duo's sources of inspiration are as diverse as their own music and Esben and Pernille highlights both **Burial**'s evocative industrial soundscapes, **David Bowie**'s insistence to challenge and explore his own self, **Brian Eno**'s production of Talking Head's against David Byrne's ferocity, Dan Snaith of **Caribou** ability to unite the electronic and the organic and even **Alanis Morissette**'s vulnerability and forgotten 90s harmonies.
